

Attention Farmers:

- **Do you have yield data?**
- **Don't have the time to turn it into maps but would like to have it done for you cheaply?**
- **Are you looking at going into variable rate?**

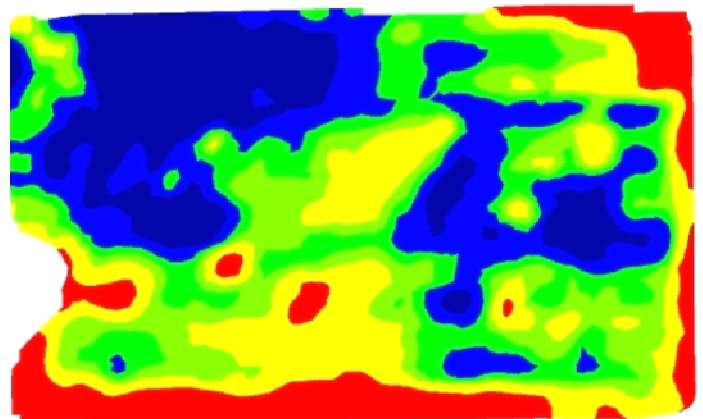

VRTonline makes the process simple!

Join VRTonline and you can upload your raw data (yield maps, soil surveys, satellite imagery etc) and the professional team at VRTonline will turn the data into maps and/or VR zones. The zones can be viewed, edited and rates inserted onto prescriptions written for all major controllers.

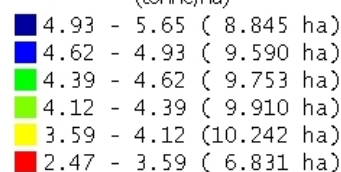

Prices start from \$100 to have your yield maps done and \$1200 to go full VR.

Why join VRTonline:

1. It is simple to use.
2. Custom built site just for viewing maps and creating prescriptions.
3. The service comes with over 10 years of VRT tech support to help you in the paddock.
4. Tech support from start to finish – collecting the data through to making it work on the controller.
5. Great knowledge of all major controllers on the market.
6. 24/7 access to your Precision Ag filing cabinet for you and your agronomist.
7. Your data is safe, secure and processed by professionals

Yield Mass (Dry)
(tonne/ha)
